USAviationFlight.com

User Guide

How to find charter operators, request quotes, book empty legs, and list your company or flights.

Cover photo: Acroterion, CC BY-SA 4.0

Welcome

USAviationFlight.com lists every FAA Part 135 charter operator in the U.S., plus international, fractional, semi-private and cargo operators, and shows empty leg flights. It's free to use.

We are a directory, not a charter broker: we don't sell flights. You contact the operator, or our booking partner Villiers, directly.

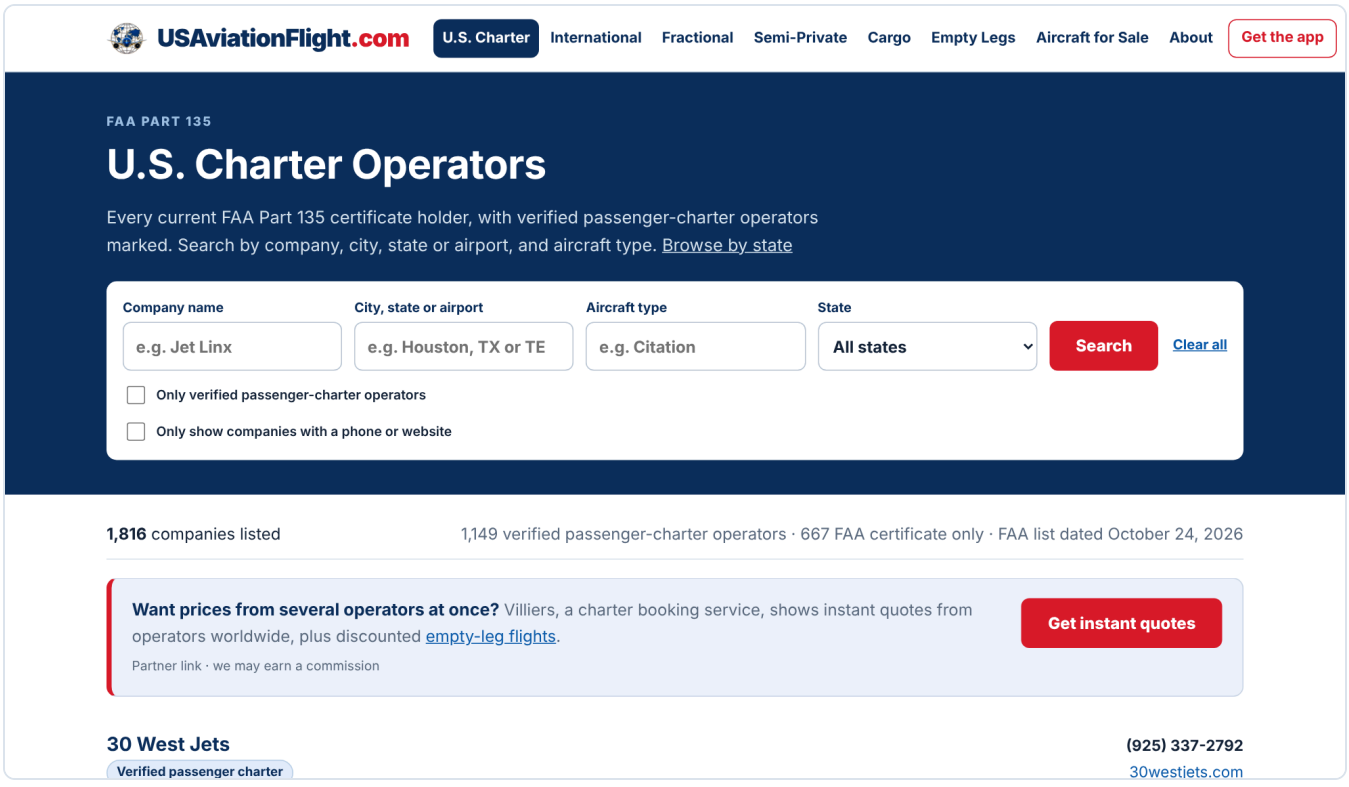
The USAviationFlight.com home page

1 Finding an operator

The home page has five directories:

Directory	What's in it
U.S. Charter	Every company holding an FAA Part 135 certificate, with verified passenger-charter operators marked
International	Charter operators outside the United States
Fractional	Fractional shares, co-ownership and jet card programs
Semi-Private	Individual seats on shared private and public-charter flights
Cargo	All-cargo airlines and freight charter operators

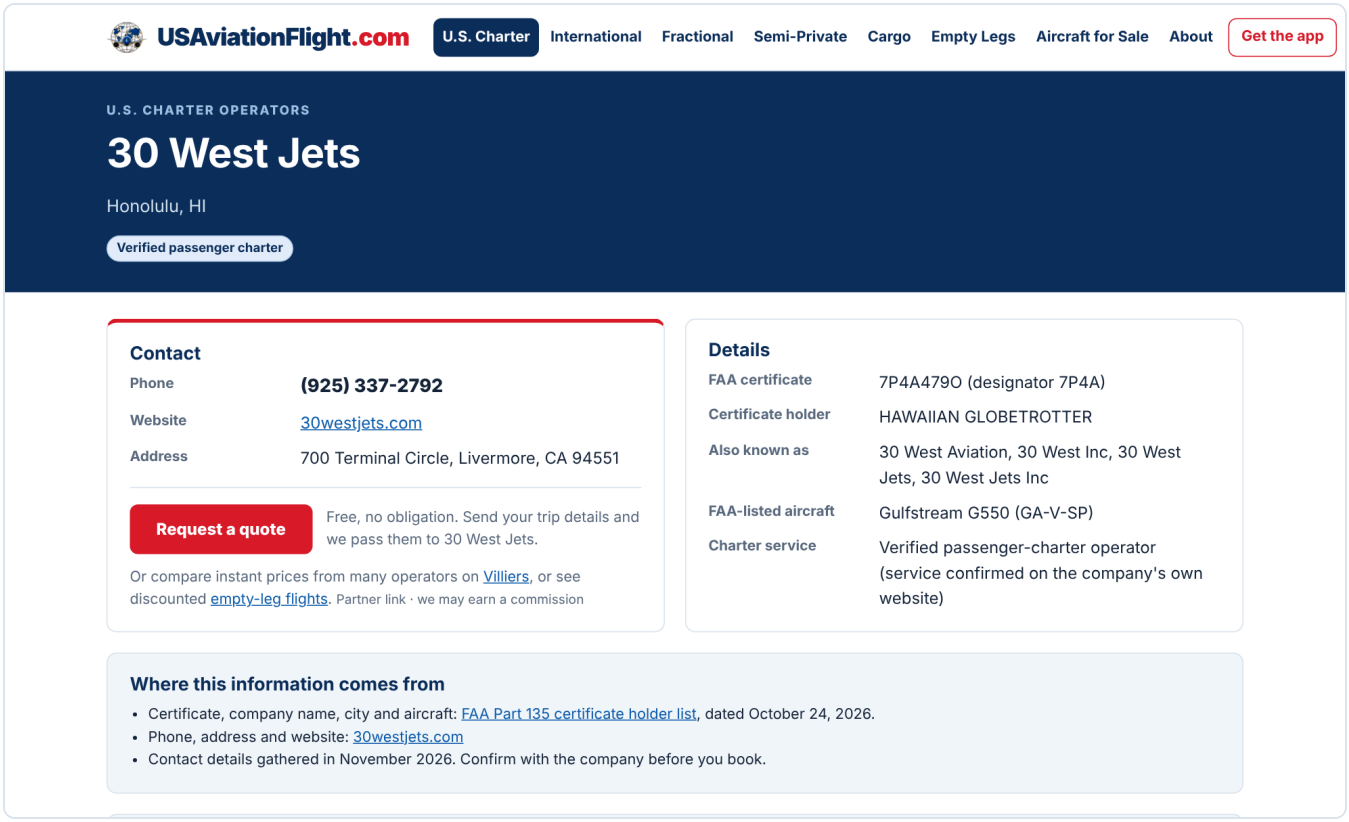
1. Pick a directory from the home page or the top menu.
2. Type a company name, city, state or airport. You can also pick a state or an aircraft type. Press **Search**.
3. To see only companies confirmed to fly passengers, tick **Only verified passenger-charter operators**.
4. Open a company to see its details.



Searching the U.S. Charter Operators directory

2 Reading an operator's page

Each company's page shows its phone, website and address, its FAA certificate, and the aircraft listed with the FAA. The bottom of the page says where each detail came from and when.



An operator's page

Label	Meaning
Verified passenger charter	Holds an FAA Part 135 certificate, and its own website confirms it flies passenger charter
FAA certificate only	Holds a Part 135 certificate, but we could not confirm it offers passenger charter
Operator-verified	The company claimed its listing and confirmed its details with us
Charter broker · does not operate aircraft	Arranges flights on other companies' aircraft

> Always confirm details directly with the company before you book.

3 Asking for a price

On a company's page, press **Request a quote** and fill in your trip. We pass your details to that operator, and they reply to you directly. It's free and there's no obligation.

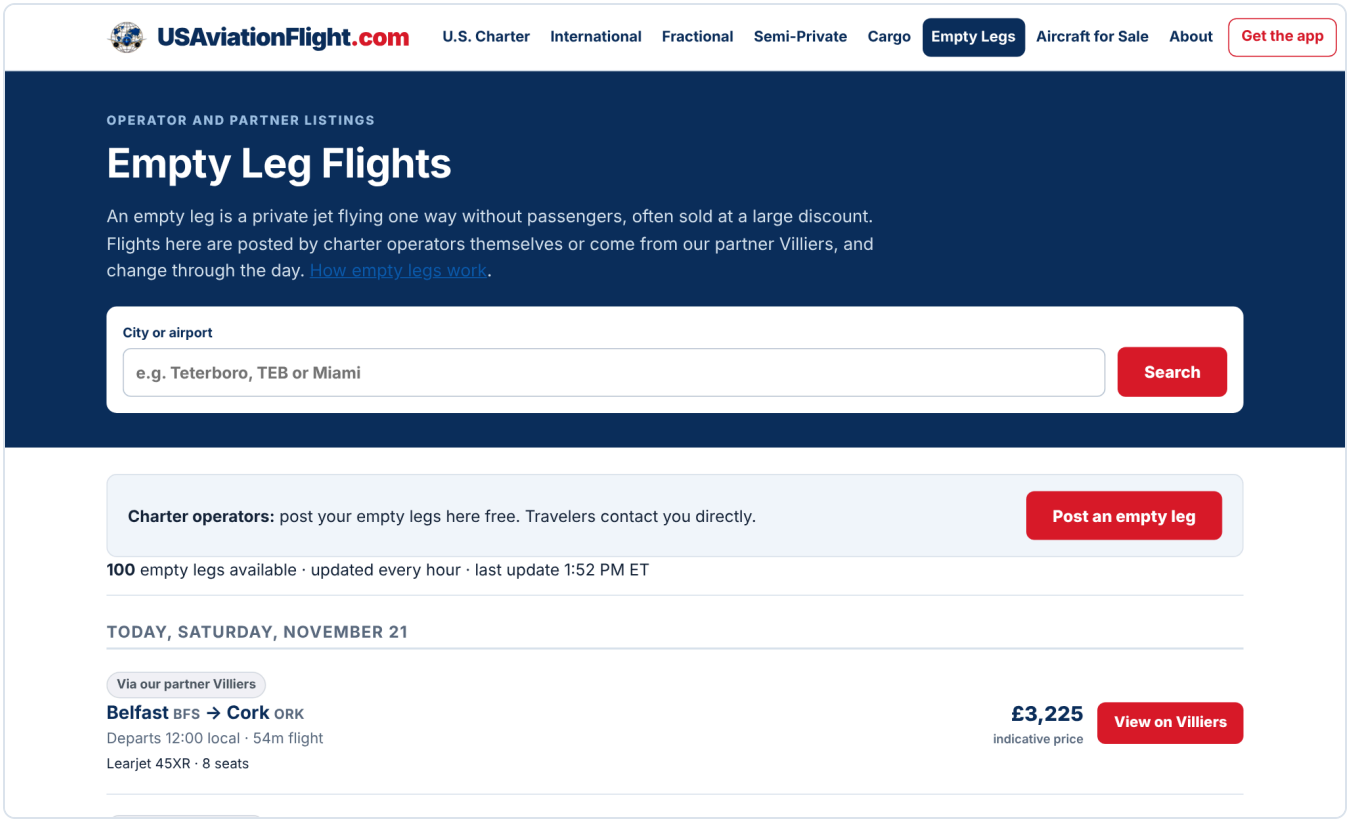
To compare prices from many operators at once, press **Get instant quotes**. This opens Villiers, a charter booking service and our partner. We may earn a commission if you book through it.

4 Empty leg flights

An empty leg is a private aircraft flying one way without passengers, often sold at a large discount.

1. Open **Empty Legs** in the top menu.
2. Type a city or airport to see flights departing near it. The list updates every hour.
3. Flights marked **Via our partner Villiers** open on Villiers to book. Flights marked **Listed by the operator** were posted by the charter company itself: contact it directly.

> Prices are indicative, shown exactly as listed, and can change through the day. The price is usually for the whole aircraft, not per seat.



The Empty Legs page

5 Charter brokers

Prefer to book through a broker? See **Charter Brokers & Booking Services**, linked at the bottom of the home page.

> A broker does not fly the aircraft. Under U.S. Department of Transportation rules, a broker must tell you which company will operate your flight. Before you pay, ask for the operator's name and look it up in the U.S. Charter directory.

6 The app on your phone

The site works as an app, with no app store and no sign-up. Tap **Get the app** in the menu, then:

iPhone or iPad

1. Open usaviationflight.com in **Safari**.
2. Tap the **Share** button (the square with an arrow).
3. Tap **Add to Home Screen**, then **Add**.

Android

1. Open usaviationflight.com in **Chrome**.
2. Tap the ⋮ menu at the top right.
3. Tap **Add to Home screen** (or **Install app**).

The app always shows the latest operators and today's empty legs. Nothing about you is stored.

7 For operators and brokers

Everything below is free. We don't take a commission on your flights.

Claim your listing

On your company's page, press **Claim this listing**. Add aircraft photos and your base airports, and get the **Operator-verified** badge.

List a company that isn't there

Use **List your company** at the bottom of any page. Choose the directory (brokers choose **Charter broker**), then enter your company, website, phone, base and aircraft. We check every request against FAA or authority records and your website before it's published.

Post an empty leg

Open to U.S. operators with an FAA Part 135 certificate.

1. Open **Post an empty leg** and find your company by name or certificate number.
2. Enter your name and work email. We email you a sign-in link that works for 24 hours.
3. The first time, we confirm you work for the company, usually within a day. You can add flights right away; they show once your account is approved.
4. For each flight, enter the airports, date, time window, aircraft, seats and the price for the whole aircraft. Up to 25 upcoming flights at a time.

Travelers contact you directly.

8 Help and contact

For	Email
